**Front End** | HTML | CSS | React.js | Typescript | Chakra UI | MobX
**Back End** | Go | Gin Framework | C# | .Net | Entity Framework | SQL Server | Postgre SQL | SignalR
**Testing/Deployment** | Microsoft Azure | Render | Github Actions | Postman
**Developer Tools** | Visual Studio Code | Visual Studio 2022 | Git | Jira

## PROJECTS

**Personal Website**: [Portfolio](#) (for additional information and projects)

### Full Stack Developer | MyAnimeVault                          Jun 2024 – Sep 2024
*Web app that allows users to track their favorite anime series*          React.js | Typescript | Go | Postgre SQL

- Designed and implemented a responsive frontend using React with Typescript and Chakra Ui for a consistent theme as well as MobX for central state management.
- Developed a RESTful Api using Go with the Gin Framework which uses a Postgre SQL database for storage and JWT Bearer tokens for authentication.
- Deployed the application using Render and set up a CI/CD pipeline which integrates with my Github repository for a seamless deployment process.

### Full Stack Developer | AgilePro                          Mar 2024 – Jun 2024
*Project Management/Collaboration Web App*          React.js| Typescript |C# | .Net 6 | Microsoft Azure

- Designed and developed a responsive frontend using React with Typescript and Chakra Ui for an appealing and consistent design as well as MobX for central state management.
- Engineered a RESTful Api using .Net 6 which implements Entity Framework for CRUD operations and JWT Bearer tokens for authentication.
- Deployed the application using a Microsoft Azure App Service and set up a CI/CD pipeline with Github Actions to automate the build and deployment process.

## CERTIFICATES

### Complete guide to building an app with .Net Core and React

- Issued by: Udemy
- Date of completion: August 2024
